We used the Pocket-Pilot maps last year when we went to Germany and the Czech Republic and they were great! The subway maps are extremely helpful. You can normally get free maps at your hotel, but we found that they were tiny and hard to read. Plus, if it rained, they were toast. This one's great because it's laminated. I would definitely recommend these to anyone traveling!0 of 0 people found the following review helpful. Good Map, But You're Still Going to Get LostBy sixThis map will get you around Rome and help you find your way to major sites and back to your hotel, but you're still going to get lost searching for the great little restaurant you read about. Rome is full of tiny little streets and alleyways that no portable map could realistically cover, but once you get back to reasonably sized street this map will get you to (or at least close to) your next destination.0 of 0 people found the following review helpful. Nice little mapBy Lisa OstaThis tiny map comes folded 3"x3" very convenient for those who want to pack light and get the lay of the land before arrival. I will often look at areas on google maps or google earth and then locate them on my little map for future reference. I bought one of each for Rome, Florence and Venice for my upcoming travels in Italy.

This deceptively small map of ARome puts most guidebooks to shame. Pocket Pilots city map/guides are shirt-pocket

sized, easy-to-fold, laminated, easy to read, and packed to bursting with useful information, including how to use/navigate the public transit system, a brief and pithy guide to the city's most popular points of interest, a neighborhood-by-neighborhood description of the city, listings of parks, cultural events, and hot spots, notes on local cuisine, and useful phrases - and, above all, a street map featuring magnifications of prime areas.

We found these really cool maps that fold down to 3"x3" ... for Rome, Venice, and Florence. They are called Pocket-Pilot maps (www.pocket-pilot.info). They are jammed with informative street maps, sites, transportation, etc. yet they are so small they are not cumbersome at all to carry around. And they are laminated. --
