Sofia Pescarin : Rome: White Star Guides - Archaeology before purchasing it in order to gage whether or not it would be worth my time, and all praised Rome: White Star Guides - Archaeology:

4 of 4 people found the following review helpful. Absolutely Essential for the Rome-bound Historical TravellerBy A Fan of the MoonA superb guide to all of the historical buildings, places, and monuments of Rome. I carried this book around with me for an entire week and no matter where I was in the city, it provided clear guidance and understanding of what I was seeing. Besides the great color photographs, it includes full-color artistic reconstructions, so that the visitor can imagine how areas looked during Imperial days. I cannot recommend this book highly enough.

Brimming with hundreds of full-color photographs, this guidebook steers travelers through the monuments of ancient

Rome, bringing history and its protagonists to life. Accompanying the insightful text, aerial views and close-ups provide an opportunity to examine the numerous archaeological treasures of Rome. Organized into four chapters that divide the city into sectors, this information-packed book explores celebrated sites such as the Coliseum and the Pantheon as well as lesser-known but hugely significant sites. From the Theater of Marcellus, begun by Caesar and opened by Augustus in 13 BC to the Caracalla Baths-the best surviving example of a thermal facility from the imperial age (work started in AD 212)-to the ornate Arch of Constantine (built in AD 315), Rome takes readers on a memorable tour through ancient history. Throughout the book, maps and three-dimensional graphic reconstructions help round out our understanding of what was once the "capital of the world."

About the Author Sofia Pescarin is a fellowship researcher in the Virtual Heritage Lab of the National Council of Research Institute of Technologies Applied to Cultural Heritage.
