Reise Knowhow : Russia East (Lake Baikal to Vladivostok) 1:2,000,000 Travel Map, waterproof, GPS-compatible, 2012 edition, REISE before purchasing it in order to gauge whether or not it would be worth my time, and all praised Russia East (Lake Baikal to Vladivostok) 1:2,000,000 Travel Map, waterproof, GPS-compatible, 2012 edition, REISE:

0 of 0 people found the following review helpful. You will dream of Siberia By Nick2032 Beautifully printed on good water resistant coated paper. Great detail for a part of the world that is hard to get good paper maps for.

Russia East (Lake Baikal to Vladivostok) 1:2,000,000 Travel Map, waterproof, GPS-compatible, REISE This map is waterproof and tear-resistant, durable enough to survive time spent in the rucksack or pocket. It is double-sided to provide the best balance between a good scale and a convenient sheet size (size 100 x 70 cm / 39.5 x 27.5 in) with topographic and tourist information. Coverage extends over south-eastern Russia at scale 1:2,000,000. The western half of the map starts from Lake Baikal (Lake Baikal itself is included). In the east, the map reaches Sakhalin island off the Pacific coast and extends north to Yakutsk. Names of larger and selected smaller towns are in both Cyrillic and alphabet; smaller places, administrative units, geographical features and places of interest are in alphabet only. Clear cartography presents the region's topography by altitude colouring with contours, numerous spot heights and names of

mountain ranges. Swamps, marshes and seasonal lakes and rivers are also shown. National parks and protected areas are marked and symbols highlight various places of interest, including locations with tourist accommodation, UNESCO World Heritage sites, museums, etc. Road and rail networks are easy to see. Road network includes selected unsurfaced local roads and tracks, shows locations of petrol stations, gives driving distances on main and secondary routes, and indicates border crossings (including the M52 route from Novosibirsk across the Altai Mountains to Mongolia). The course of the Trans-Siberian railway line is easy to follow across the map and local airports are indicated. The map has a latitude and longitude grid at intervals of 1°. Multilingual legend includes English, the map has a place name index plus a list of national parks. High quality German cartography. For Lake Baikal, a separate map is available from the same publisher at scale 1:550,000.
