From Mairs Geographischer Verlag, Kurt Mair : Russia, Ukraine and Belarus GeoCenter Euro Map (GeoCenter Maps) before purchasing it in order to gauge whether or not it would be worth my time, and all praised Russia, Ukraine and Belarus GeoCenter Euro Map (GeoCenter Maps):

This brand new edition Euro map has been fully updated and has a scale of 1:2 Million and legend in 8 languages. It is extremely easy to use; grid references in the margin aid quick orientation and colour changes to the mapping make transport networks clearer than ever before. The comprehensive 31 page index booklet also lists basic driving regulations and emergency telephone numbers for Russia, Ukraine and Belarus, making this an indispensable resource for your trip.
