Reise Knowhow : Santorini (Greece) 1:25,000 Visitor's Map with street plans REISE before purchasing it in order to gauge whether or not it would be worth my time, and all praised Santorini (Greece) 1:25,000 Visitor's Map with street plans REISE:

2 of 2 people found the following review helpful. Good guide for walking or driving on Santorini By dorothy Recently my family spent time on the island of Santorini- we preferred hiking and walking rather than tours- this map was very helpful guiding us to areas we would want to visit- I never saw a decent map for sale in any of the stores on the island. The map is now sitting in a drawer in my house- is anyone planning to visit Santorini? 2 of 2 people found the following review helpful. must buy map for Santorini visitors By long time member A good choice if you are going to Santorini. A detailed map is very difficult to obtain once you are on the island. We spent two weeks on Santorini and had a small car. The map was valuable and I encourage you to obtain one. 0 of 0 people found the following review helpful. Five Stars By Kelly H. It has what I need

Santorini (Thira, Greece) 1:25,000 Hiking Map, waterproof, GPS-compatible with 5 town plans REISE This map is waterproof and tear-resistant, highly durable in the course of travelling, double-sided to provide the best balance between a good scale and a convenient sheet size (size 100 x 70 cm / 39.5 x 27.5 in) with topographic and tourist information. It presents the islands of Santorini, Thirasia and Nea Kameni at scale 1:25,000 (1 inch = 0.4 miles), which is a scale commonly used for US city plans. Topography is shown by altitude and bathymetric colouring with contours

and spot heights. Road network shows local roads and tracks, gives driving distances on main and secondary roads and indicates scenic routes and locations of petrol stations. Ferry routes along the coast and to the nearby islands of Kameni and Thisaria are also marked. A separate inset of the whole of the Cyclades (1:1,000,000) shows ferry connections to Athens and between various islands. The map shows locations of isolated hotels, campsites, youth hostels, restaurants and tavernas, beaches and harbours, viewpoints, archaeological sites, wineries, windmills, etc. Place names are given in both scripts. The map has a latitude and longitude grid at intervals of 1'. Map legend includes English. On the reverse are large detailed street plans at 1:2,600 of Fira (Thira), Ia, Imerovogli, Kamari and Perissa, indicating numerous accommodation and other facilities. All plans have indexes similar to the one provided for the main map. Two detailed plans show the archeological remains of Old Thira and Akrotiri. Also provided is an interesting set of seven panels showing the changes in the shape and the topography of the island over the geological time scale. Accompanying text is in German and English.
