Dr Kalpana Bhatawdekar : Scandinavia, Russia: A Travelogue before purchasing it in order to gage whether or not it would be worth my time, and all praised Scandinavia, Russia: A Travelogue:

Authors of this travelogue, Dr Kalpana Bhatawdekar and Shyam Bhatawdekar traveled extensively on business in their capacity of top notch business executives, highly sought after business and management consultants, eminent

management gurus, authentic human behavior experts and prolific authors. Yet they felt that traveling and seeing different places as a part of their business driven journeys was not as complete an experience of the visited places, as they would have liked it to be. That realization gave a kick-start to their additional journeys purely as dedicated tourists. Simultaneously, they started journalizing their various travel and sightseeing experiences. They decided to bring their travelogues in open in order to share these with all. The first travelogue published in the form of a book narrated their journey to Scandinavian countries and Russia. It was titled Travelogue: Scandinavia, Russia. It was published in both the formats- eBook as well as paperback. Both the formats contained a number of photographs of the places visited by the authors. The readers liked the book quite a lot. But due to inclusion of the photographs the cost of the printed version of the book became little too high to be easily ordered. Therefore the printed version of the book was edited to exclude the photographs. This particular book in its printed form is now being presented to the readers without the photographs while retaining the complete narrative of the earlier version of the book. In order to distinguish it from the earlier book this present book is being published under a new title, Scandinavia, Russia: A Travelogue.
