Excerpt from Search for Winter Sunbeams in the Riviera, Corsica, Algiers, and Spain
What a beam of light can accomplish - has it not been the theme of many a girlish composition, as well as of scientific disquisition? The regeneration of the Earth with every Auroral advent, is it not a perpetual hymn of praise to the Creator of light, and an ever during and radiant rainbow-covenant of His love? What a beam can do, even after its untired tour of millions of miles, and through uncounted periods of duration - how it gilds the starry vault, and builds the heavenly structure - how before it the clouds about our star dissolve and the blackness of night is dispelled; and how chaos becomes cosmos, is but the type of what can be wrought upon the human frame and spirit by its sanitary and cheering influence.
