Bulgaria is one of the least known countries in Europe. Tucked away in the southeast corner of Europe it has been hiding many treasures away unbeknown to many outsiders. Most, if not all travel books about Bulgaria cover well-trodden tourist resorts and understandingly ignoring lesser-known parts of Bulgaria. These 'fortunate' neglected areas, where tourism hasn't affected, remain in my and many others' opinion the most treasured parts of Bulgaria. The writing contains a variety of titles ranging from an epitaph of a simple Bulgarian village farmer to a traditional Bulgarian recipe with a local twist; articles giving humorous moments to more serious issues that Bulgarians have to contend with. It is seen with a clear view of how Bulgarians live and work both in towns and villages remaining firmly family and community bound.
