5 of 5 people found the following review helpful. Thorough mapBy DKI just returned from a road trip of Slovenia and Croatia with a little Bosnia for a day. It's a perfectly fine paper map, which I personally still prefer over GPS (faster, no battery issues, bugs, etc.). My minor critiques are that sometimes the road numbers aren't conspicuous and that the size of the map makes it unwieldy (lots of folding and re-folding, which more quickly deteriorates the paper). Please know that the countries' road signs most often use "city destinations with arrows pointing the direction" (e.g. "Split --->"; imagine lots of traffic circles, which actually work very well) rather than "road number with direction" (e.g. "A1 south"). In all, I'm glad I had this though perhaps not indispensable if you have a good guide book.0 of 0 people found the following review helpful. It was a cow path full of ruts and gullies, where we could only drive 5 MPH for hours and it was a part of the country with no cell signal so we had no other guidance. We lost a half day in Dubrovnik as a result.1 of 1 people found the following review helpful. ... you should not expect too much detail - but good for planning a general routeBy Eric E. HasselbergThis is a larger scale map and you should not expect too much detail - but good for planning a general route. Paper could be heavier so be gentle!
