Jackie Todd : Spanish Pointers before purchasing it in order to gage whether or not it would be worth my time, and all praised Spanish Pointers:

Not the usual tale of the frustrations and trials of starting a new life in a new country. This is the story of the fulfillment of a dream, though not quite the dream originally planned. An early retirement. A Spanish pointer. A

Mediterranean tabby. Eight years, six houses, and 12 adopted, abandoned animals later, Jackie and Stephen's love affair with Andalucia continues unabated. Please meet Antonio, the rascally owner of the local bar. Lourdes the Lycra clad angel, Paco, his team of builders and the rest of the village characters. Add to this a motley cast of animals, each with their own personalities. Spanish Pointers is a book that will leave you with a smile.

About the Author Made in Hong Kong and born in Edinburgh, Jackie has one son, David. After a career in sales and marketing for the design industry, she now lives in Andalucia, southern Spain.
