Annie Le Vogeur : Teenager en Provence before purchasing it in order to gage whether or not it would be worth my time, and all praised Teenager en Provence:

Anne's father announces his plans to move to the South of France during school summer holidays, where she will finish her education in an International College. His relocation dream come true, her worst nightmare. Just 15, she discovers a new world in Cannes that she learns to love, mixing with teenagers from all over the world. Exams over, she finds herself in a caravan in the middle of a vineyard in a mountain valley, with only her parents and brother for company. This amusing travel memoir recounts the ups and downs of family life as they adapt to their new world.
