East View Press : Terrain Analysis of Ukraine before purchasing it in order to gage whether or not it would be worth my time, and all praised Terrain Analysis of Ukraine:

The latest addition to East View's series of terrain analysis products, Terrain Analysis of Ukraine is based on detailed analytical reports found on the verso side of each 1:200,000 scale topographic map produced by national mapping authorities. These reports draw on detailed on-site surveys and long-term observations. This unique publication delivers a descriptive and visual geographic knowledge base of Ukraine's population, roads, topography and soils, hydrology, vegetation and climate. Where possible, East View has updated the reports with additional data from

authoritative sources. Published in English for the first time, and supplemented with hundreds of full-color topographic and soil maps, Terrain Analysis of Ukraine makes an abundance of detailed local geographic data accessible to a global audience. Terrain Analysis of Ukraine is the ideal resource for peacekeeping forces, humanitarian organizations, embassy personnel, regional analysts, reconstruction specialists, local authorities, geographers and earth scientists, and the international business community.
